Weekly Fish and Water Operations Outlook 4/30/2024 – 5/06/2024

Water Project Operational Intent for Week

- Effective 4/1, CVP and SWP project operations are limited to a 14-day average OMRI flow no more negative than -2,500 cfs per the Director's decision on 3/29.
- The 2024 IOP is expected to control CVP exports this week.
- I/E ratio export constraints per Section 8.17 of State ITP will control SWP exports for this week.

Forecasted Weather

- Dry and mild through the week. Gusty at times, with the strongest winds expected Tuesday night into Wednesday. The forecast is less certain for the weekend, with cooler temperatures and a chance of rain.
