

## Weekly Fish and Water Operations Outlook 2/27/2024 – 3/5/2024

## Water Project Operational Intent for Week

- Effective 2/7 operations will be limited to a 7-day average OMRI flow no more negative than -3,500 cfs per the 2023 IOP/ITP COA 8.5.2. until the average measured Secchi depth, as defined in the IOP and ITP, is greater than 1 meter; X2 at Chipps for 28 days in February; E/I <= 0.35.
- Proposed Action- Water project operations are currently limited to a 14-day average OMRI of no more negative than –2,500 cfs based on the 75% loss threshold for Steelhead being exceeded.
- Reclamation will be in close coordination with other agencies to resolve the operational plan in response to the 100% exceedance for Steelhead

## **Forecasted Weather**

 A weak system today brings some showers and snow into the Central Valley. A more active pattern begins late in the week through this weekend. Precipitation, snow, gusty winds and abnormally cold temperatures near freezing with morning frost are forecasted to return with this system.

## Tables

Table 1: Anticipated weekly operational ranges by tributary. Environmental and fish conditions updated by respective watershed groups at varying intervals that may not coincide with the weekly range of Water Operations

| Tributary/Division | Anticipated Weekly Ranges   | Related Environmental and Fish Conditions |
|--------------------|---|---|
| Clear Creek        | <ul> <li>Current Release: 200 cfs</li> <li>Anticipated Weekly Range of Releases: 200 – 700 cfs</li> </ul> | Spring-run Chinook salmon fry rearing.    |

| Sacramento River | • Sharta Storago: 2 997 MAE   | <ul> <li>Fall-run Chinook salmon eggs are incubating and hatching. Juveniles are emerging and rearing.</li> <li>Late fall-run Chinook Salmon adults are spawning and eggs are incubating.</li> <li>Adult O. mykiss are migrating and spawning. Their eggs are incubating and juveniles are rearing.</li> <li>(Updated 2/5/2024)</li> <li>Late fall-run Chinook adults are</li> </ul>   |
|------------------|---|--|
| Sacramento rivei | <ul> <li>Shasta Storage: 3.897 MAF</li> <li>Current Release: 35,000 cfs</li> <li>Anticipated Weekly Range of Releases: 20,000 cfs to 35,000 cfs for flood management.</li> </ul>  | continuing their spawning but we are past  |
| Feather River    | <ul> <li>Oroville Storage: 2.973 MAF</li> <li>Current Release: 12,000 cfs</li> <li>Anticipated Weekly Range of Releases: 8,000 cfs to 20,000 cfs for flood management.</li> </ul>   | <ul> <li>Fall-run Chinook salmon adult spawning has ended. Eggs are incubating in gravel. Fry are beginning to emerge and migrate downstream.</li> <li>O. mykiss juveniles are rearing. Adults are spawning and eggs are incubating in gravel.</li> <li>Adult green sturgeon are still holding in the LFC near Fish Barrier Dam.</li> <li>Spring-run Chinook salmon adult spawning has ended. Fry are emerging and migrating downstream.</li> <li>(Updated 2/27/2024)</li> </ul> |
| American River   | <ul> <li>Folsom Storage: 617 TAF</li> <li>Current Release: 6,000 cfs</li> <li>Anticipated Weekly Range of Releases: 6,000 cfs to 8,000 cfs for flood management</li> </ul>  | <ul> <li>O. mykiss juveniles are rearing.</li> <li>Adult fall-run Chinook salmon spawning has ended.</li> <li>Eggs are incubating in gravel.</li> <li>Fry are beginning to emerge and migrate downstream.</li> <li>O. mykiss – Adults present</li> <li>(Updated 1/30/2024)</li> </ul>  |
| Stanislaus River | <ul> <li>New Melones Storage: 1.981 MAF</li> <li>Current Release: 1,000 cfs</li> <li>Anticipated Weekly Range of Releases: 1,000 – 3,000 cfs for flood management</li> </ul>  | <ul> <li>O. mykiss - Adult and juveniles present</li> <li>Fall-run Chinook salmon spawning has ended.</li> <li>Eggs are incubating in gravel.
